

Amp

Benefits:

- ✓ **High Protein Levels**
- ✓ **Improved Digestibility**
- ✓ **Good Palatability**
- ✓ **Great Rust Resistance**

Seeding Rates:

New Seeding:
30-40 lbs. per acre

Interseeding:
15-20 lbs. per acre

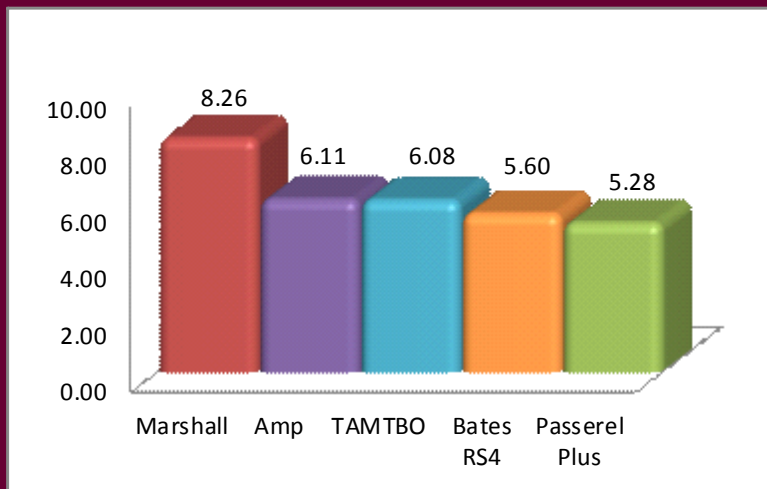

Companion Crop:
15-20 lbs. per acre

Amp is an early maturing tetraploid variety of annual ryegrass.

Amp has increased forage matter production and higher sugar content that animals crave.

Amp has great rust resistance, high vigor during establishment and superior early spring growth.

Amp is highly digestible. It has a high level of non-structural carbohydrates and good palatability.
