Black Tail is a brand new Turf Type Tall Fescue that has shown superior performance in the NTEP trials. Black Tail is a solid overall performer in traffic stress trials, fine leaf texture, and brown patch resistance. Black Tail aggressive tillering characteristic contributes to its dense, lush canopy.

Black Tail was highly rated in the NTEP Transition regions. Black Tail can be used alone or as a component of a blend with other Tall fescues. Black Tail Turf Type Tall Fescue is perfect for many application use on home lawns, parks, sod production, erosion control, sports fields and commercial properties.

This variety provides superior density throughout the growing season in all parts of the US due to its aggressive tillering ability which also helps repair damaged areas of turf. It is an excellent choice for sod producers because of its aggressive tillering trait as it enables faster recovery and reduces the weed invasion.

Benefits

- Top 10 for Turfgrass Quality in NTEP LPI Group 2
- Aggressive Tillering 
- Great Brown Patch Resistance
- Excellent Shade Tolerance
- Great Density During the Growing Season
- Traffic Tolerance
