Sea Fire is a new Slender Creeping Red Fescue. Sea Fire is good for problem areas with high salinity water and soils. One of the most efficient ways to improve the health of the turfgrass in salinity situations is to select and use salinity tolerant cultivars like Sea Fire .

Characteristics of Sea Fire are fine texture, medium green color, quick establishment, tolerates low mowing height, low growth habit, great shade tolerance, and can tolerate sunny areas. You can use Sea Fire alone or in a mixture. Sea Fire can be used for roadsides, or any high salinity turf situation.
