Thunderstruck is a new and improved turf type tall fescue from Columbia Seeds. Thunderstruck has some great turf qualities like its dark green genetic color, excellent disease resistance, good density and has shown strong tolerance to drought conditions. This variety provides superior density throughout the growing season in all parts of the US due to its aggressive tillering ability which also helps repair damaged areas of turf.

Thunderstruck was rated #1 in Net Blotch resistance, which causes small brown spots on grass leaves. It was also top rated for Drought Tolerance.

Thunderstruck is rated top 10 in the 2012 NTEP, 2013 Data Genetic Color trial and Rated #1 in the 2012 NTEP, 2013 Data Fall Color (October) test.

When looking for the best in turf type tall fescue choose Thunderstruck for your application use on home lawns, parks, sod production, sports fields and commercial properties. This variety mixes well with other Turf Type Tall Fescues, Kentucky Bluegrass, Perennial Ryegrass and Fine Fescues.

Benefits

- Drought Stress Tolerance
- Dark Green
- Aggressive Tillering (AT®)
- Great Fall Density
- Excellent Net Blotch Disease Resistance
