

Variety Description

Variety

MERLYN

Species	White clover
Botanical name	Trifolium repens
Ploidy	2
Seeding rate	12–15 kg/ha
Distance between rows	as cereals
Sowing period	March to August
Sowing depth	1–2 cm

Agronomic figures*:

Development after sowing	6
Tendency to winterkilling	4
DM-yield total	6
DM-yield first cut	5
DM-yield in aftermath	6
Crude protein content	5
Beginning of flowering	5
Sward density	5

Clarification of figures*:

1: very early, very low / 5: medium / 9: very late, very high

Variety description

MERLYN is one of the varieties recommended by the Chambers of Agriculture and is ideal for high-quality mixtures. MERLYN has a good yield distribution and is extremely persistent. The variety is also extremely winter-hardy, very well-adjusting, takes well to treading and cutting and has the ability to rapidly grow back again. Thanks to its prolific runner formation, MERLYN can close gaps very rapidly.

Most important characteristics

High-yielding
Extremely winter-hardy
High protein content
High sward density
Takes well to treading and cutting

Usage

Also available as coated seed [**Mantelsaat®**]

Suitable inoculant with appropriate rhizobia for seed inoculation:

RhizoFix® RF-40
