

RAPTOR

RED CLOVER

Raptor is the next generation, multipurpose red clover developed by Blue Moon Farms LLC. Raptor provides high quality perennial clover to be used in mixtures or pure stands for pasture, hay, silage, green choi, soil improvements and wildlife habitat. Raptor provides excellent dry matter yield and is persistence throughout the market territory. Raptor was selected from surviving summer field plants and rogued for the absence of powder mildew.

APPLICATIONS

- Excellent for frost seeding into pastures
- Excellent for reducing the toxic effect of E+ tall fescue
- Legume component of haylage
- Excellent component for high quality pasture
- Excellent used to thicken up declining alfalfa stands

MANAGEMENT

- Seeding Rate (pure stand): 8 - 10 pounds per acre
- Seeding Rate (pasture): 6 - 8 pounds per acre
- Seeding Rate (pure stand): 4 - 8 pounds per acre
- Planting Depth: 1/4 - 1/2 inch

FEATURES

- Excellent source of nitrogen
- Excellent seedling vigor
- High quality
- Helps mask the effect of toxic endophyte in fescue

BENEFITS

- Provides nitrogen for pastures and cover crop
- Helps improve frost seed success
- Improved animal performance
