Establishment

Clancy is first generation Texas Bluegrass x Midnight Kentucky Bluegrass. Years of selections and testing have shown Clancy has superior drought tolerance, drought recovery and persistence. Clancy will perform in areas of warm temperatures and periods of extended drought or limited access to irrigation. Clancy establish quickly, creating a dense, fine leaved turf. Clancy exhibits early spring green-up making it ideally suited for Kentucky bluegrass adapted areas.

Clancy's turf performance makes it ideally suited for blending with other Kentucky bluegrasses, fine fescue, and tall fescue.

### Benefits

- Excellent Drought Tolerance
- Excellent Drought Recovery
- Excellent Heat Tolerance
- Dense, fine leaf texture
- Wear Tolerance

Estimated Seeds per Pound - 1,100,000

### Seeding Rates

New Establishment:	3-4lbs/1,000 square feet
Overseeding:	1-2lbs/ 1,000 square feet
