

DYNAPLUS

FORAGE DIPLOID ANNUAL RYEGRASS

DynaPlus is a new improved diploid annual ryegrass selected for high forage yields, improved disease resistance particularly to crown rust. Exceptional persistence under stress provides improved forage production in the most difficult environments. The extensive root structure makes it ideal for cover crops to improve soil tilth, create root channels and pull up excess nutrients. High digestible dry matter makes DynaPlus idea for your animal nutrient needs.

APPLICATIONS

- Cover cropping to improve soil tilth, increase root channels and hold excess nutrients from previous crop
- Early spring grazing

MANAGEMENT

- Seeding Rate (pure stand): 30 - 40 pounds per acre
- Seeding Rate (interseeding): 15 - 20 pounds per acre
- Seeding Rate (covercrop): 10 - 15 pounds per acre
- Planting Depth: 1/4 - 1/2 inch

FEATURES

- Excellent seeding vigor
- Crown rust resistance
- High quality
- Vigorous, fast growing roots

BENEFITS

- Improved quality and grazing period
- Excellent for cover cropping and grazing
- Improved animal production
- Rapid ground cover to reduce weed competition

PERFORMANCE DATA

Variety	Total
Feast II -----	1.85
Amp -----	1.70
DynaPlus -----	1.64
Meroa -----	1.50
GrazeKeeper -----	1.30
Gulf -----	1.27
