Color	Leaf Texture	Density	Wear Tolerance	Cold Tolerance	Drought Tolerance	Establishment	Salt Tolerance	Disease Resistance
								

NewGreen is a high-quality perennial ryegrass bred from top performing varieties. It exhibits excellent density and fine leaf texture due to the aggressive growth habit of the variety. NewGreen is highly rated for heat and salt tolerance, making it a great option for areas where there is not much water or high saline irrigation water.

It is quick to establish and has excellent divot recover for a dense and durable turf throughout the growing season. NewGreen is an excellent choice for warm season overseeding of dormant Bermudagrass on golf courses, home lawns, and commercial properties.

## Benefits

- Top Rated Overseeding Performance
- Dark Green Color
- Wear Tolerant
- Salt Tolerance **+**  
**ST**
- Divot Recovery
- Gray leaf spot resistance **+**  
**PGL**
