

APPALACHIAN

Color	Leaf Texture	Shade Tolerance	Wear Tolerance	Cold Tolerance	Drought Tolerance	Density	Disease Resistance	Establishment

Appalachian Kentucky Bluegrass is known for its quick establishment, early spring green-up, and good color. In addition to dark, dense turf, Appalachian also provides excellent cold tolerance and disease resistance.

Appalachian is a rhizomatous grass that spreads to repair itself from wear, fill in open areas, or thicken existing stands. This makes Appalachian a great variety seeded alone or in mixtures with other species.

With good overall turf quality, Appalachian is ideal for lawns, parks, playgrounds, and other turf applications.

Appalachian is VA/MD listed.

Benefits

- Quick establishment and early spring green-up
- Strong disease resistance
- Dark green color
- Great cold tolerance

Seeding Rates

New Establishment:	3-4 lbs/ 1,000 square feet
Overseeding:	1-2 lbs/ 1,000 square feet
