Rust

Mammoth possesses excellent overall turf quality. With a robust disease package, Mammoth is tolerant to grey leaf spot, brown patch, and stem rust. Mammoth also displays exceptional summer density and has shown good heat and drought tolerance, thanks to its mammoth root structure. To top it off, this turf type tall fescue variety also has excellent establishment and mowing qualities.

Benefits

- Industry leader against grey leaf spot
- Tolerant to brown spot
- Good mowing qualities
- Good heat and drought tolerance
- Medium fine leaf texture
- Dark green color
