Savant II is the next generation of stoloniferous perennial ryegrass. Its aggressive spreading habit helps turf fill in faster than other perennial ryegrass on the market and crowds out undesirable grasses and weeds. Savant II has a medium green color, fine leaf texture, and excellent density. Savant II has shown excellent summer heat resistance, good wear tolerance, and excellent salt tolerance.

Savant II has widespread adaptation and is well suited for use on athletic fields, home lawns, commercial properties, sod farms, golf courses, and areas where extremely durable perennial ryegrass is desired. Use Savant II alone or in the Natural Knit® or Clubhouse® SPR® blend.

Benefits

- Great Turf Density
- Widespread Adaptation
- Excellent Leaf Spot and Crown Rust Resistance
- Medium Green Color
- Fine Leaf Texture
- Top Rated for Salt Tolerance

Seeding Rates

Overseeding	2- 3 lbs/1,000 sq ft
New seeding	3-5 lbs/1,000 sq ft
